The Watchman's Rattle Rebecca D. Costa 2012-11-13 Why can't we solve our problems anymore? Why do threats such as the Gulf oil spill, worldwide recession, terrorism, and global warming suddenly seem unstoppable? Are there limits to the kinds of problems humans can solve? Rebecca Costa confronts--and offers a solution to--these questions in her highly anticipated and game-changing book, *The Watchman's Rattle*. Costa pulls headlines from today's news to demonstrate how accelerating complexity quickly outpaces that rate at which the human brain can develop new capabilities. With compelling evidenced based on research in the rise and fall of Mayan, Khmer, and Roman empires, Costa shows how the tendency to find a quick solution--leads to frightening long-term consequence: Society's ability to solve its most challenging, intractable problems becomes gridlocked, progress slows, and collapse ensues. A provocative new voice in the tradition of thought leaders Thomas Friedman, Jared Diamond, and Malcolm Gladwell, Costa reveals how we can reverse the downward spiral. Part history, part social science, part biology, *The Watchman's Rattle* is sure to provoke, engage, and incite change.

The Land of Heart's Delight Michael Layland 2013-10-01 Shortlisted for the 2014 City of Victoria Butler Book Prize Shortlisted for a 2014 BC Book Prize Finalist for the Lieutenant-Governor's Medal for Historical Writing Just how, and why, did Vancouver Island get onto the map? How was knowledge of our immediate geography acquired and recorded? With 130 maps, dating between 1593 and 1915, this cartographic history tells the story of how Vancouver Island and the surrounding area came to be mapped. The book shows local cartographic milestones, marking progress in our knowledge through the island's rich--although comparatively short--recorded history. However, the maps, by themselves and without context, cannot tell the whole story. The accompanying text reveals the motives, constraints, agendas, and intrigues that underpin their making. The narrative, roughly chronological, begins before the arrival of Europeans and concludes at the outset of the First World War and includes an introduction on the history and significance of map-making, as well as an afterword summarizing subsequent cartographic developments. Also included are an index, endnotes, a list of cartographic sources, and a glossary.

Manufacturing Processes for Design Professionals Rob Thompson 2007-11-30 An encyclopaedic guide to production techniques and materials for product and industrial designers, engineers, and architects. Today's product designers are presented with a myriad of choices when creating their work and preparing it for manufacture. They have to be knowledgeable about a vast repertoire of processes, ranging from what used to be known as traditional "crafts" to the latest technology, to enable their designs to be manufactured effectively and efficiently. Information on the internet about such processes is often unreliable, and search engines do not usefully organize material for designers. This fundamental new resource explores innovative production techniques and materials that are having an impact on the design industry worldwide. Organized into four easily referenced parts--Forming, Cutting, Joining, and Finishing--over seventy manufacturing processes are explained in depth with full technical descriptions; analyses of the typical applications, design opportunities, and considerations each process offers; and information on cost, speed, and environmental impact. The accompanying step-by-step case studies look at a product or component being manufactured at a leading international supplier. A directory of more than fifty materials includes a detailed technical profile, images of typical applications and finishes, and an overview of each material's design characteristics. With some 1,200 color photographs and technical illustrations, specially commissioned for this book, this is the definitive reference for product designers, 3D designers, engineers,

and architects who need a convenient, highly accessible, and practical reference.

Family Tree Whakapapa 2020 "Family Tree Whakapapa brings together the work of four sisters: elin o'Hara Slavick, Madeleine Slavick, Sarah Slavick and Susanne Slavick. As curators, painters, photographers and writers, all have incorporated images of trees in social, political and environmental conditions -- trees that stand as refuge and livelihood, consumed and consuming, under assault and triumphant, as historical record and as harbinger of things to come. Family Tree Whakapapa offers perspectives both unsettling and soothing as nature increasingly reflects salient issues of our times. Based on experiences in Japan, elin presents photographic works that bear witness to the ongoing aftermath of atomic bombs in Hiroshima and Nagasaki and the nuclear power disaster in Fukushima. Madeleine's photographs decry the marginalisation of trees, they reveal dichotomies and their collapses in our experience of nature in environments both rural and urban. Sarah's paintings explore the underground life of trees in an elegiac series that conveys both grief and hope, for what is threatened and for what might survive through possible strategies that trees offer for all species on the planet. Susanne hand paints trees derived from 'tree of life' carpet designs over printed scenes of environmental destruction and depredation. These trees do not lie down like doormats; they rise up and persist, suggesting the possibility of recovery."--Aratoi website (accessed 3/02/2021).

Handbook of Plastics Testing Technology Vishu Shah 1998-11-06 From the reviews of the bestselling First Edition: "A very useful contribution to the plastics industry. Mr. Shah has successfully filled a void between the identification of a test method, implementation of the test, and some understanding of the meaning of the results. . . . Caroline Gordon Veronica A. Makowsky 1989 The author of nine novels, three collections of short stories, and two critical works, Caroline Gordon produced an impressive--though unjustly neglected--body of work. Her considerable contributions to modern Southern fiction notwithstanding, her life was especially fascinating for two other reasons: the prominent literary circles in which she moved and her heroic efforts to "have it all"--marriage, career, and family--at a time when such aspiration was neither touted nor supported. Sensitive, engaging, and richly detailed, this biography captures Gordon's life in all its multiple layers. As the wife of the poet Allen Tate, Gordon became intimately connected with members of the Fugitive/Agrarian circle, notably Robert Penn Warren and Andrew Lytle. As the Fugitives expanded their vision from Southern to modernistic approaches to literature, Gordon's circle of friends and acquaintances grew to include Ford Madox Ford, T.S. Eliot, Katherine Anne Porter, Scott and Zelda Fitzgerald, Ernest Hemingway, Flannery O'Connor, Walker Percy, Eudora Welty, Robert Lowell, Maxwell Perkins, Hart Crane, William Faulkner, and many others. Even more intriguing, though, is Gordon's story as a Southerner, a woman, and a writer--roles that, for her, were as often mutually exclusive as synergistic. Her life was in some ways similar to that of Zelda Fitzgerald: the Southern belle with the writer-husband and artistic aspirations of her own. Unlike Zelda, Caroline Gordon did not collapse under the strain, although there were prices she paid--particularly in her intense and tangled relationship with Allen Tate, whose work overshadowed her own (or so it seemed to her) and whose philanderings were a continual source of strain and jealousy. In addition to following the windings of Gordon's life--through New York and Tennessee, through England and Paris--Veronica Makowsky looks closely at Gordon's key works--including such novels as *Penhally*, a complex family saga that was her first published book; *Aleck Maury*, *Sportsman*, the much loved classic for which she is still remembered; *The Malefactors*, a portrait of an aging poet modeled after Tate; and her much admired short stories. In conducting her research, Makowsky interviewed Gordon shortly before her death in 1981 and also received the full cooperation of Gordon's family in gaining access to the novelist's papers. From such rich sources she has produced a compellingly readable portrait of a remarkable woman.
