Fernand Braudel 1992-12-23  
By examining in detail the  
material life of pre-industrial  
peoples around the world,  
Fernand Braudel significantly  
changed the way historians  
view their subject. Originally  
published in the early 1980s,  
Civilization traces the social  
and economic history of the  
world from the Middle Ages to  
the Industrial Revolution,  
although his primary focus is  
Europe. Braudel skims over  
politics, wars, etc., in favor of  
examining life at the grass  
roots: food, drink, clothing,

housing, town markets, ~~Commerce~~  
~~money~~,  
credit, technology, the growth  
of towns and cities, and more.  
Volume I describes food and  
drink, dress and housing,  
demography and family  
structure, energy and  
technology, money and credit,  
and the growth of towns.

A History of Civilizations

Fernand Braudel 1995-04-01  
Written from a consciously  
anti-ethnocentric approach,  
this fascinating work is a  
survey of the civilizations of the  
modern world in terms of the  
broad sweep and continuities  
of history, rather than the  
"event-based" technique of  
most other texts.

**The Mediterranean in the Ancient World** Fernand Braudel 2002-04-25 This general reader's history of the ancient mediterranean combines a thorough grasp of the scholarship of the day with an great historian's gift for imaginative reconstruction and inspired analogy. Extensive notes allow the reader to appreciate thestate of scholarship at the time of writing, the scale and breadth of Braudel's learning and the points where orthodoxy has changed, sometimes vindicating Braudel, sometimes proving him wrong. Above all the book offers us the chance to situate Braudel's mediterranean, born of a

lifetime's love and knowledge, more clearly in the climates of the sea's history.

Tapping Hitler's Generals

Sönke Neitzel 2013-07-19 These transcripts of

wiretapped conversations between Nazi officers reveal “a fascinating—and chilling—insight into the German view of the war” (Financial Times). Between 1939 and 1942, the British Directorate of Military Intelligence created a number of POW interrogation camps in and around London where they secretly recorded private conversations between senior German staff officers. In this extraordinary work, historian Sonke Neitzel examines these transcripts in depth and presents the private thoughts, opinions, and secrets of Nazi officers during the Second World War. These transcripts address important questions regarding the officers’ attitudes towards the German leadership and Nazi policies: How did the German generals judge the overall war situation? From what date did they consider it lost? How did they react to the attempt on Hitler’s life in July 1944? What knowledge did they have of the atrocities? By turns insightful and horrifying, this

unprecedented research is a must for any serious scholar of the period. “A goldmine of information about what the German High Command privately thought of the war, Adolf Hitler, the Nazis and each other.” —Daily Mail

**Making Big Money in 1600** Nelly Hanna 1998-05-01 Nelly Hanna's work challenges the standard perceptions about Middle East society and economy of the seventeenth century. Both novel in its approach and information, this book's central theme revolves

around the rise of an indigenous form of capitalism existing as early as the 1600s. Making Big Money in 1600 examines the reemergence of the economic sector and its complex influences on social conditions during this time. By examining the life and work of Isma'il Abu Taqiyya, Hanna traces the relationship between economic activities and culture. As we are introduced to Abu Taqiyya we learn how he negotiates partnership with other merchants, arranges for the handling of goods, and negotiates loans for colleagues. Hanna reveals his home life, his wives, children, and concubines, his relations with his family and friends, and how these relations evolved and were affected by the changing social and economic conditions- a perspective rarely discussed in works before the modern period.

A Nation upon the Ocean Sea  
Daviken Studnicki-Gizbert  
2007-01-04 With the opening of sea routes in the fifteenth century, groups of men and women left Portugal to

establish themselves across the Commerce  
ports and cities of the Atlantic or Ocean sea. They were refugees and migrants, traders and mariners, Jews , Catholics, and the Marranos of mixed Judaic-Catholic culture. They formed a diasporic community known by contemporaries as the Portuguese Nation. By the early seventeenth century, this nation without a state had created a remarkable trading network that spanned the Atlantic, reached into the Indian Ocean and Asia, and generated millions of pesos that were used to bankroll the Spanish empire. A Nation Upon the Ocean Sea traces the story of the Portuguese Nation from its emergence in the late fifteenth century to its fragmentation in the middle of the seventeenth and situates it in relation to the parallel expansion and crisis of Spanish imperial dominion in the Atlantic. Against the backdrop of this relationship, the book reconstitutes the rich inner life of a community based on movement, maritime trade, and cultural hybridity. We are

introduced to mariners and traders in such disparate places as Lima, Seville and Amsterdam, their day-to-day interactions and understandings, their houses and domestic relations, their private reflections and public arguments. This finally-textured account reveals how the Portuguese Nation created a cohesive and meaningful community despite the mobility and dispersion of its members; how its forms of sociability fed into the development of robust transatlantic commercial networks; and how the day-to-day experience of trade was translated into the sphere of Spanish imperial politics of commercial reform based on religious-ethnic toleration and the liberalization of trade. A microhistory, *A Nation Upon the Ocean Sea* contributes to our understanding of the broader histories of capitalism, empire, and diaspora in the early Atlantic.

[A Brief History of Commercial Capitalism](#) Jairus Banaji  
2020-07-07 The rise of capitalism to global dominance

is still largely associated – by both laypeople and Marxist historians – with the industrial capitalism that made its decisive breakthrough in 18th century Britain. Jairus Banaji's new work reaches back centuries and traverses vast distances to argue that this leap was preceded by a long era of distinct "commercial capitalism", which reorganised labor and production on a world scale to a degree hitherto rarely appreciated. Rather than a picture centred solely on Europe, we enter a diverse and vibrant world. Banaji reveals the cantons of Muslim merchants trading in Guangzhou since the eighth century, the 3,000 European traders recorded in Alexandria in 1216, the Genoese, Venetians and Spanish Jews battling for commercial dominance of Constantinople and later Istanbul. We are left with a rich and global portrait of a world constantly in motion, tied together and increasingly dominated by a pre-industrial capitalism. The rise of Europe to world domination, in this

view, has nothing to do with any unique genius, but rather a distinct fusion of commercial capitalism with state power. *Civilization* Niall Ferguson 2011-11-01 From the bestselling author of *The Ascent of Money* and *The Square and the Tower* "A dazzling history of Western ideas." —*The Economist* "Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase." —*Wall Street Journal* "[W]ritten with vitality and verve . . . a tour de force." —*Boston Globe* Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or "killer applications"—competition, science, the rule of law, modern medicine,

consumerism, and the Work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

*The Jews and Modern  
Capitalism* Werner Sombart  
2017-09-04 Since its first  
appearance in Germany in  
1911, Jews and Modern  
Capitalism has provoked  
vehement criticism. As Samuel  
Z. Klausner emphasizes, the

lasting value of Sombart's work  
Commerce  
rests not in his results-most of  
which have long since been  
disproved-but in his point of  
departure. Openly  
acknowledging his debt to Max  
Weber, Sombart set out to  
prove the double thesis of the  
Jewish foundation of capitalism  
and the capitalist foundation of  
Judaism. Klausner, placing  
Sombart's work in its historical  
and societal context, examines  
the weaknesses and strengths  
of Jews and Modern  
Capitalism.

*An Anthropology of Money* Tim  
Di Muzio 2017-03-16 An  
Anthropology of Money: A  
Critical Introduction shows  
how our present monetary  
system was imposed by elites

and how they benefit from it.

The book poses the question: how, by looking at different forms of money, can we appreciate that they have different effects? The authors demonstrate how modern money requires perpetual growth, an increase in inequality, environmental devastation, increasing commoditization, and, consequently, the perpetual consumption of ever more stuff. These are not intrinsic features of money, but, rather, of debt-money. This text shows that, through studying money in other cultures, we can have money that better serves the broader goals of society.

*The Struggle for Development and Democracy* Alessandro Olsaretti 2021-12-16 "In The Struggle for Development and Democracy Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash, namely, uneven development and divisive politics. multidisciplinary humanist social science, to overcome the flaws of neoliberal economic theories, and to recover a balanced approach to theories and policies alike that is especially needed in the wake of the 9/11 attacks. These led to divisive culture wars, which were compounded by the divisive populist politics. This book begins to sketch such a humanist social science, and applies it to answer one question: who is responsible for neoliberalism and the populist backlash?"--

**For a New West** Karl Polanyi  
2014-11-10 At a recent meeting of the World Economic Forum in Davos, it was reported that a ghost was haunting the deliberations of the assembled global elite - that of the renowned social scientist and economic historian, Karl Polanyi. In his classic work, *The Great Transformation*, Polanyi documented the impact of the rise of market society on western civilization and captured better than anyone else the destructive effects of the economic, political and social crisis of the 1930s. Today, in the throes of another Great Recession, Polanyi's work has gained a new significance. To understand the profound challenges faced by our democracies today, we need to revisit history and revisit his work. In this new collection of unpublished texts - lectures, draft essays and reports written between 1919 and 1958 - Polanyi examines the collapse of the liberal economic order and the demise

of democracies in the inter-war years. He takes up again the fundamental question that preoccupied him throughout his work - the place of the economy in society - and aims to show how we might return to an economy anchored in society and its cultural, religious and political institutions. For anyone concerned about the danger to democracy and social life posed by the unleashing of capital from regulatory control and the dominance of the neoliberal ideologies of market fundamentalism, this important new volume by one of the great thinkers of the twentieth century is a must-read.  
Saving Capitalism Robert B. Reich 2015-09-29 From the author of *Aftershock* and *The Work of Nations*, his most important book to date—a myth-shattering breakdown of how the economic system that helped make America so strong is now failing us, and what it will take to fix it. Perhaps no one is better acquainted with the intersection of economics and politics than Robert B.

Reich, and now he reveals how power and influence have created a new American oligarchy, a shrinking middle class, and the greatest income inequality and wealth disparity in eighty years. He makes clear how centrally problematic our veneration of the "free market" is, and how it has masked the power of moneyed interests to tilt the market to their benefit. Reich exposes the falsehoods that have been bolstered by the corruption of our democracy by huge corporations and the revolving door between Washington and Wall Street: that all workers are paid what they're "worth," that a higher minimum wage equals fewer jobs, and that corporations must serve shareholders before employees. He shows that the critical choices ahead are not about the size of government but about who government is for: that we must choose not between a free market and "big" government but between a market organized for broadly based prosperity and one designed to deliver the most gains to the top. Ever the

pragmatist, ever the optimist,

Reich sees hope for reversing our slide toward inequality and diminished opportunity when we shore up the countervailing power of everyone else. Passionate yet practical, sweeping yet exactingly argued, *Saving Capitalism* is a revelatory indictment of our economic status quo and an empowering call to civic action.

**Selected Writings** Karl

Polanyi 2018-06-29 Few figures are more crucial to understanding the upheavals of our contemporary era than Karl Polanyi. In a world riven by social and economic crises, from rising inequality to the decay of democratic institutions and profound technological disruption, Polanyi's path-breaking account of the dynamics of market capitalism and his defence of society and nature against the dangerous tendencies of the market capitalist system are more relevant than ever. This book brings together Polanyi's most important articles and essays to give a unique selection of his essential shorter writings, mixing classic texts with significant but previously little-known pieces. It highlights the coherence and richness of Polanyi's theoretical and political approach, making it indispensable for understanding his overarching intellectual contribution. The volume includes his interwar writings, which deal with the

world economic crisis and the socialist alternative to conservative and fascist developments; his reflection on political theory and the international situation after the war; and his comparative studies of economic institutions. Polanyi's political writings are complemented and supported by the critique of economic determinism and what he termed 'our obsolete market mentality'. This book is an invaluable companion to Polanyi's masterpiece, *The Great Transformation*, and an essential resource for students and scholars of political economy, sociology, history and political philosophy.

**A History of Private Life: Riddles of identity in modern times** Philippe Ariès 1987 Library has Vol. 1-5. *Life in Renaissance France* Lucien Febvre 1977 In writing about sixteenth-century France, Lucien Febvre looked for those changes in human consciousness that explain the process of civilization--the most specific and tangible examples of men's experience, the most

vivid details of their daily lives.

These essays, written at the height of Febvre's powers and sensitively edited and translated by Marian Rothstein, are the most lucid, evocative, and accessible examples of his art.

### Capital in the Twenty-First Century Thomas Piketty

2017-08-14 What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and

the diffusion of knowledge <sup>Commerce</sup>

have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

**Out of Italy** Fernand Braudel 2019-07-16 From the author of *Memory and the Mediterranean*, a comprehensive history of the Italian city states from 1450 to 1650. In the fifteenth century, even before the city states of the Apennine Peninsula began to coalesce into what would become, several centuries later, a nation, "Italy" exerted enormous influence over all of Europe and throughout the Mediterranean. Its cultural,

economic, and political **Commerce**

dominance is utterly astonishing and unique in world history. Viewing the Italy?the many Italies?of that time through the lens of today allows us to gather a fragmented, multi-faceted, and seemingly contradictory history into a single unifying narrative that speaks to our current reality as much as it does to a specific historical period. This is what the acclaimed French historian, Fernand Braudel, achieves here. He brings to life the two extraordinary centuries that span the Renaissance, Mannerism, and the Baroque and analyzes the complex interaction between art, science, politics, and commerce during Italy's extraordinary cultural flowering.

History of Civilizations of Central Asia: Development in contrast : from the sixteenth to the mid-nineteenth century

Ahmad Hasan Dani 2003-01-01

The period treated in this volume is highlighted by the slow retreat of nomadism and the progressive increase of sedentary polities owing to a fundamental change in military technology: Furthermore, this period certainly saw a growing contrast in the pace of economic and cultural progress between Central Asia and Europe. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas. ### **Memory and the**

**Mediterranean** Fernand Braudel 2011-02-09 A grand sweep of history by the late Fernand Braudel—one of the twentieth century’s most influential historians—Memory and the Mediterranean chronicles the Mediterranean’s immeasurably rich past during the foundational period from prehistory to classical antiquity, illuminating nothing less than the bedrock of our civilization and the very origins

of Western culture. Essential for historians, yet written explicitly for the general reader, this magnificent account of the ebb and flow of cultures shaped by the Mediterranean takes us from the great sea's geologic beginnings through the ancient civilizations that flourished along its shores. Moving with ease from Mesopotamia and Egypt to the flowering of Crete and the early Aegean peoples, and culminating in the prodigious achievements of ancient Greece and Rome, Braudel conveys in absorbing detail the geography and climate of the region over the course of millennia while brilliantly explaining the larger forces that gave rise to agriculture, writing, sea travel, trade, and, ultimately, the emergence of empires. Impressive in scope and gracefully written, *Memory and the Mediterranean* is an endlessly enriching work of history by a legend in the field.
