You Are What You Drive Jay Lamm You are what you drive, whether it's a Ferrari F50, a 30-year-old diesel Rabbit, or a Saab. What does your car say about you--and do you really want to know? This tongue-in-cheek handbook is the ultimate guide to what your automotive choices reveal, and what everyone else's rides say about them. Where pop psychology meets Popular Mechanics, You Are What You Drive begins. Better buckle your seat belt--it could be a bumpy ride. Are you, for instance, a 1979 Pontiac Trans-Am owner, prone to black satin parkas and peppermint schnapps, partial to Styx singing "Come Sail Away" and likely to vacation at Dollywood? No problem, simply settle in and learn more than you might want to know about that neighbor who drives a Chevette, or the colleague with a Porsche, or the date with a Prius. All in fun it may be, but Jay Lamm's identification system is remarkably apt, nearly unfailingly accurate, and hilariously entertaining for whoever's not in the driver's seat.

A Long Paddle Home R G Wright 2019-04-18 Fire dances within the confines of the stone lined pit. Shadows appear and begin moving to the flames' rhythm. Steven Stiles sits on the ground beside the fire and apprehensively scans the darkness enveloping the trees. He focuses his attention on the log book which rests on his thigh. As his pencil transcribes his thoughts, one shadow begins to move with purpose. My thoughts are my own, for now. I'm not sure if it's out there, but I feel it; somewhere just outside the reach of the light. Raw and elemental, it is absolutely formidable. What the hell did I sign up for? Steven Stiles prefers the company of trees to that of people. Patrolling the waterways of a wilderness park, he unwittingly engages forces which will alter the very essence of what he believed he was. Through a series of seemingly random encounters, Steven=s world suddenly expands to include friends he had not sought, the love he had always yearned for, and the companionship of a two-year-old dog named Rusty. He will have to learn to trust them if he's going to survive the energy which is determined to consume him. R.G.W.

Terra Nova Eric W. Sanderson 2013-06-04 A look at what the American lifestyle has done to the environment—and how to move toward a better future. In the last century, three powerful forces—oil, cars, and suburbs—buoyed the American dream. Yet now, the quality of life in the United States is declining due to these same three forces. Our dependence on oil is a root cause of wars, recessions, and natural disasters. Cars consume an outsize share of our incomes and force us to squander time in traffic. Meanwhile, expensive, spread-out suburbs devour farmland—and in a vicious cycle, further entrench our reliance on cars and oil. In Terra Nova, conservation ecologist Eric W.

Sanderson—the national bestselling author of Mannahatta—offers concrete steps toward a solution. He delves into natural history, architecture, chemistry, and politics, to show how the American relationship to nature has shaped our past, and how it can affect our future. Illustrated throughout with maps, charts, and infographics, Terra Nova demonstrates that it is indeed possible to achieve a better world. "Sanderson commendably outlines 'a new way of life . . . designed to sustain American prosperity, health, and freedom for generations to come.'" —Publishers Weekly

Oil 101 Morgan Downey 2009 "Since 1859, oil has enabled and defined our economic, social and political landscape. Throughout this time, abundant supply ensured low, stable prices and the inner workings of the oil industry remained relatively obscure. Following a century and a half of relative calm, oil prices have become much more volatile as the sustainability and growth of reliable supply sources have been brought into question. This book provides a guide to oil; from its history, to

sources of supply and drivers of demand; from how prices are determined daily in global wholesale oil markets, to how those markets are connected to prices at the pump." -- Book jacket.
