Oxford Atlas of the World Oxford University Press 2010 Provides maps and satellite

photography that reflect the most recent political, economic, and demographic statistics, and presents articles addressing the environment and population matters in major cities of the world.

Atlas of the World 2021-10 The only world atlas updated annually, Oxford's Atlas of the World is the most authoritative atlas on the market. Full of crisp, clear cartography of urban areas and natural landscapes around the globe, the Atlas contains maps of cities and regions at carefully selected scales that give a striking view of the Earth's surface. It opens with a detailed survey of world statistics, a six-page feature examining human migration, and an immersive collection of satellite images of Earth, including stunning new photographs specially sourced and processed for this atlas. The volume continues with a Gazetteer of Nations that has been comprehensively updated to include recent economic and political changes. The extensive thematic World Geography section is beautifully

illustrated with charts, maps, and graphs on diverse topics of geographic significance, such as climate change, biodiversity, oceans and seas, population and cities, conflict and cooperation, energy and minerals, tourism and travel, global health, wealth, and standards of living. The hundreds of city and world maps that form the body of the Atlas have been thoroughly updated for this 28th edition. Providing the finest global coverage available, the Atlas of the World offers a diverse collection of information and cartography of unrivaled accuracy and clarity, presented in an uncommonly beautiful volume. *World Atlas of Mangroves* Mark Spalding 2010-09-23 Published with ISME, ITTO and project partners FAO, UNESCO-MAB, UNEP-WCMC and UNU-INWEH This atlas provides the first truly global assessment of the state of the world's mangroves. Written by a leading expert on mangroves with support from the top international researchers and conservation organizations, this full colour atlas contains 60

full-page maps, hundreds of photographs and illustrations and a comprehensive country-by-country assessment of mangroves. Mangroves are considered both ecologically and from a human perspective. Initial chapters provide a global view, with information on distribution, biogeography, productivity and wider ecology, as well as on human uses, economic values, threats, and approaches for mangrove management. These themes are revisited throughout the regional chapters, where the maps provide a spatial context or starting point for further exploration. The book also presents a wealth of statistics on biodiversity, habitat area, loss and economic value which provide a unique record of mangroves against which future threats and changes can be evaluated. Case-studies, written by regional experts provide insights into regional mangrove issues, including primary and potential productivity, biodiversity, and information on present and traditional uses and values and sustainable management.
