**The Balanced Scorecard and Beyond - Applying Theories of Performance Measurement, Employment and Rewards in Management Accounting Education** Paul Eisenberg

2016 This study applies the prevailing scholarly theories of strategic management, employment decisions, cost accounting and share reward schemes to a panel of questions raised by Colin Drury (2012) in the case study of the fictitious company Integrated Technology Services (UK) Ltd., ITS (UK). The paper provides model answers which can be used when working with the case study at institutions of higher education. The merit of the work lies in three areas. First, it provides an overview of theories accepted by the academia that can be utilized for further research. Second, it contrasts pro and contra arguments. Thus it shows the limitations of the very theories when applied to scenarios inspired by practical problems. Third, it develops an innovative Balanced Scorecard for ITS (UK). The scorecard can be used as an example when working with Drury's case study. But it is also suitable for real life situations of business entities faced with oppressive overheads and deteriorating

*Criminal Evidence* Paul Roberts 2021-09-20 Roberts and Zuckerman's *Criminal Evidence* is the eagerly-anticipated third of edition of the market-leading text on criminal evidence, fully revised to take account of developments in legislation, case-law, policy debates, and academic commentary during the decade since the previous edition was published. With an explicit focus on the rules and principles of criminal trial

procedure, Roberts and Zuckerman's *Criminal Evidence* develops a coherent account of evidence law which is doctrinally detailed, securely grounded in a normative theoretical framework, and sensitive to the institutional and socio-legal factors shaping criminal litigation in practice. The book is designed to be accessible to the beginner, informative to the criminal court judge or legal practitioner, and thought-provoking to the advanced student and scholar: a textbook and monograph rolled into one. The book also provides an ideal disciplinary map and work of reference to introduce non-lawyers (including forensic scientists and other expert witnesses) to the foundational assumptions and technical intricacies of criminal trial procedure in England and Wales, and will be an invaluable resource for courts, lawyers and scholars in other jurisdictions seeking comparative insight and understanding of evidentiary regulation in the common law

tradition.

**Are Prisons Obsolete?** Angela

Y. Davis 2011-01-04 With her

characteristic brilliance, grace

and radical audacity, Angela Y.

Davis has put the case for the

latest abolition movement in

American life: the abolition of

the prison. As she quite

correctly notes, American life

is replete with abolition

movements, and when they

were engaged in these

struggles, their chances of

success seemed almost

unthinkable. For generations of

Americans, the abolition of

slavery was sheerest illusion.

Similarly, the entrenched

system of racial segregation

seemed to last forever, and

generations lived in the midst

of the practice, with few

predicting its passage from

custom. The brutal, exploitative

(dare one say lucrative?)

convict-lease system that

succeeded formal slavery

reaped millions to southern

jurisdictions (and untold

miseries for tens of thousands

of men, and women). Few

predicted its passing from the

American penal landscape.

Davis expertly argues how

social movements transformed

these social, political and

cultural institutions, and made

such practices untenable. In

*Are Prisons Obsolete?*,

Professor Davis seeks to

illustrate that the time for the

prison is approaching an end.

She argues forthrightly for "decarceration", and argues for the transformation of the society as a whole.
