Post-Human Futures Mark Carrigan 2021-04-13 This volume engages with post-humanist and transhumanist approaches to present an original exploration of the question of how humankind will fare in the face of artificial intelligence. With emerging technologies now widely assumed to be calling into question assumptions about human beings and their place within the world, and computational innovations of machine learning leading some to claim we are coming ever closer to the long-sought artificial general intelligence, it defends humanity with the argument that technological 'advances' introduced artificially into some humans do not annul their fundamental human qualities. Against the challenge presented by the possibility that advanced artificial intelligence will be fully capable of original thinking, creative self-development and moral judgement and therefore have claims to legal rights, the authors advance a form of 'essentialism' that justifies providing a 'decent minimum life' for all persons. As such, while the future of the human is in question, the authors show how dispensing with either the category itself or the underlying reality is a less plausible solution than is often assumed.

To understand and analyse the Indian federal system, this book examines the origins and footprints of the federal form of government in North America, Western Europe, Asia and Africa. It goes on to discuss its origins in history and contemporary politics. It further examines the core institutional sites of federalism such as political federalism, fiscal federalism, ancillary federal features including federal structures, federal infrastructures, federal ecosystem and judicial federalism. This book underlines the value of federalism for complex and diverse societies like India as a condition for the success of democracy and the unity of the nation.

The Third Dimension A K Agarwal 2013-07-24 The Maoist Insurgency has been born out of long periods of social discontent, economic hardships and state apathy towards the neglected masses. Anti-Maoist operations have to be based on a strong political will, aggressive anti-guerrilla tactics and economic and social development of affected areas to win back the confidence of the people. A common perception is that in these operations, the role of air power is normally overlooked. History differs and tells us that air power has been used extensively to quell past insurgencies. This book explores the nature of insurgencies and air power lessons from past insurgencies. After analysing the Maoist insurgency, the employment of air assets in supporting the security forces is examined.

Mumbai: Post 26/11 Ram Puniyani 2010-05-01 This compilation analyzes the terror attacks on 26/11 in Mumbai from various angles, based on the understanding that deeper issues are hidden behind every such tragedy. It discusses terrorism, law, Indo-Pak relations, the indigenous causes of terrorism in India, the role of the state, the pattern of investigations so far, the prevalent laws, the response of civic society, the role of the media, the unsolved puzzles and the need for a deeper inquiry into the incident. Most of the chapters have been written in the immediate aftermath of the incident and bear the imprint of the pain and anguish it caused. With a focus on 26/11, the chapters discuss the entire phenomenon of terrorism. The broad contours of the analysis include the killing of non-combatants, the political motive or the statement behind such killings, and the secret planning of such attacks where the actors

are even willing or keen to lay down their lives for bringing about such devastation. The book will be of great interest to the public at large and also to policy makers.

Policing Rohit Choudhary 2009-04-11 A first-of-its-kind, this book

proposes a marketing plan for the police, using the conventional

framework of marketing management. While there is considerable

discussion and criticism of the way the police force functions in India, no

comprehensive alternative model has been proposed to implement the

New Police Management (NPM) approach in the force's operations. In

fact, the necessity for overhauling the police system is strongly felt all over the world in the light of the recent international security lapses. The framework that this book suggests comprises current situation analysis, SWOT analysis, STP analysis and the 8 Ps. Policing: Reinvention Strategies in a Marketing Framework combines marketing principles with the empirical knowledge of police operations to suggest improvements in the Indian police force. It uses the marketing motto of 'keeping the customer at the centre' as key to finding solutions to the issues that the police face in their everyday operations. In addition, it carries case studies related to police operations from across the world and suggests ways of adapting the strategies used in these to the Indian context. In doing so, the book offers valuable inputs for police academies, public administration, public policy, and state security commissions, as it not only analyses the current situation in the police force, but also draws a clear and practicable roadmap to revamp it.
