The Eye of Dread Emma Payne Erskine
2020-09-28 Two whip-poor-wills were uttering their insistent note, hidden somewhere among the thick foliage of the maple and basswood trees that towered above the spring down behind the house where the Ballards lived. The sky in the west still glowed with amber light, and the crescent moon floated like a golden boat

above the horizon's edge. The day had been unusually warm, and the family were all gathered on the front porch in the dusk. The lamps within were unlighted, and the evening wind blew the white muslin curtains out and in through the opened windows. The porch was low,--only a step from the ground,--and the grass of the dooryard felt soft and cool to the bare feet of the children. In front and all around lay the garden--flowers and fruit quaintly intermingled. Down the long path to the gate, where three roads met, great bunches of peonies lifted white blossoms--luminously white in the moonlight; and on either side rows of currant bushes cast low, dark shadows, and here and there dwarf crab-apple trees tossed pale, scented flowers above them. In the dusky eveninglight the iris flowers showed frail and iridescent against the dark shadows under the bushes. The children chattered quietly at their play, as if they felt a mystery around them, and small Betty was sure she saw fairies dancing on

the iris flowers when the light breeze stirred them; but of this she said nothing, lest her practical older sister should drop a scornful word of unbelief, a thing Betty shrank from and instinctively avoided. Why should she be told there were no such things as fairies and goblins and pigwidgeons, when one might be at that very moment dancing at her elbow and hear it all? So Betty wagged her curly golden head, wise with the wisdom of childhood, and went her own ways and thought her own thoughts. As for the strange creatures of wondrous power that peopled the earth, and the sky, and the streams, she knew they were there. She could almost see them, could almost feel them and hear them, even though they were hidden from mortal sight. Did she not often go when the sun was setting and climb the fence behind the barn under the great locust and silver-leaf poplar trees, where none could see her, and watch the fiery griffins in the west? Could she not see them flame and flash, their wings spreading far out across the

sky in fantastic flight, or drawn close and folded about them in hues of purple and crimson and gold? Could she not see the flying mist-women flinging their floating robes of softest pink and palest green around their slender limbs, and trailing them delicately across the deepening sky? Had she not heard the giants--nay, seen them--driving their terrible steeds over the tumbled clouds, and rolling them smooth with noise of thunder, under huge rolling machines a thousand times bigger than that Farmer Hopkins used to crush the clods in his wheat field in the spring? Had she not seen the flashes of fire dart through the heavens, struck by the hoofs of the giants' huge beasts? Ah! She knew! If Martha would only listen to her, she could show her some of these true things and stop her scoffing. *Freckles* Gene Stratton-Porter 2016 *Freckles*, a nameless Irish waif when the story opens, moved by the power of a mighty love, takes hold of his life, performs deeds of heroism in his guardianship of the Limberlost timber leases,

and at length, through the help of the woman he loves, comes into possession of his name and patrimony. Other characters, only a little less interesting, are McLean, a member of the Grand Rapids Lumber Co., Freckles' friend and boss; Lord O'More, who seeks a lost relative and finds him in the hero, and Black Jack, a handsome villain, whose thought of repentance comes too late.

The Gates of Sleep Mercedes Lackey

2003-03-04 Mercedes Lackey's magical Elemental Masters series recasts familiar fairy tales in a richly-imagined alternate Victorian world For seventeen years, Marina Roeswood had lived in an old, rambling farmhouse in rural Cornwall in the care of close friends of her wealthy, aristocratic parents. As the ward of bohemian artists in Victorian England, she had grown to be a free thinker in an environment of

fertile creativity and cultural sophistication. But the real core of her education was far outside societal norms. For she and her foster parents were Elemental Masters of magic, and learning to control her growing powers was Marina's primary focus. But though Marina's life seemed idyllic, her existence was riddled with mysteries. Why, for example, had she never seen her parents, or been to Oakhurst, her family's ancestral manor? And why hadn't her real parents, also Elemental Masters, trained her themselves? That there was a secret about all this she had known from the time she had begun to question the world around her. Yet try as she might, she could get no clues out of her guardians. But Marina would have answers to her questions all too soon. For with the sudden death of her birth parents, Marina met her new guardian—her father's eldest sister Arachne. Aunt Arachne exuded a dark magical aura unlike anything Marina had encountered, a stifling evil that seemed to threaten Marina's very spirit.

Slowly Marina realized that her aunt was the embodiment of the danger her parents had been hiding her from in the backwoods of Cornwall. But could Marina unravel the secrets of her life in time to save herself from the evil that had been seeking her for nearly eighteen years? *The Dark Frigate* Charles Boardman Hawes 1923 A young man dares not return to England after his ship is taken over by pirates and he becomes a member of their crew.

Twisted Bert Ashe 2015-06-09 In *Twisted: My Dreadlock Chronicles*, professor and author Bert Ashe delivers a witty, fascinating, and unprecedented account of black male identity as seen through our culture's perceptions of hair. It is a deeply personal story that weaves together the cultural and political history of dreadlocks with Ashe's own mid-life journey to lock his hair. Ashe is a fresh, new voice that addresses the importance of black hair in the 20th and 21st centuries through an accessible, humorous, and literary style sure to engage a wide variety of readers. After leading a far-too-conventional life for forty years, Ashe began a long, arduous,

uncertain process of locking his own hair in an attempt to step out of American convention. Black hair, after all, matters. Few Americans are subject to snap judgements like those in the African-American community, and fewer communities face such loaded criticism about their appearances, in particular their hair. *Twisted: My Dreadlock Chronicles* makes the argument that the story of dreadlocks in America can't be told except in front of the backdrop of black hair in America. Ask most Americans about dreadlocks and they immediately conjure a picture of Bob Marley: on stage, mid-song, dreads splayed. When most Americans see dreadlocks, a range of assumptions quickly follow: he's Jamaican, he's Rasta, he plays reggae; he stinks, he smokes, he deals; he's bohemian, he's creative, he's counter-cultural. Few styles in America have more symbolism and generate more conflicting views than dreadlocks. To "read" dreadlocks is to take the cultural pulse of America. To read *Twisted*:

My Dreadlock Chronicles is to understand a larger story about the truths and biases present in how we perceive ourselves and others. Ashe's riveting and intimate work, a genuine first of its kind, will be a seminal work for years to come.

Wash Day Diaries Jamila Rowser 2022-06-14 A 2023 Alex Award Winner A Los Angeles Times Book Prize Winner From writer Jamila Rowser

and artist Robyn Smith comes a captivating graphic novel love letter to the beauty and endurance of Black women, their friendships, and their hair. *Wash Day Diaries* tells the story of four best friends—Kim, Tanisha, Davene, and Cookie—through five connected short story comics that follow these young women through the ups and downs of their daily lives in the Bronx. The book takes its title from the wash day experience shared by Black women everywhere of setting aside all plans and responsibilities for a full day of washing, conditioning, and nourishing their hair. Each short story uses hair routines as a window into these four characters' everyday lives and how they care for each other. Jamila Rowser and Robyn Smith originally kickstarted their critically acclaimed, award-winning slice of life mini comic, *Wash Day*, inspired by Rowser's own wash day ritual and their shared desire to see more comics featuring the daily lived experiences of young Black women. *Wash Day Diaries* includes an updated,

full color version of this original comic—which follows Kim, a 26-year-old woman living in the Bronx—as the book's first chapter and expands into a graphic novel with short stories about these vibrant and relatable new characters. In expanding the story of Kim and her friends, the authors pay tribute to Black sisterhood through portraits of shared, yet deeply personal experiences of Black hair care. From self-care to spilling the tea at an hours-long salon appointment to healing family rifts, the stories are brought to life through beautifully drawn characters and different color palettes reflecting the mood in each story. At times touching, quiet, triumphant, and laugh out loud funny, the stories of *Wash Day Diaries* pay a loving tribute to Black joy and the resilience of Black women. For too long, hairstylists and hair-care companies have ignored the needs of women with kinky, curly, or wavy hair, focusing on it as "problem" hair rather than celebrating its unique texture. In the Bubble John Thackara 2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is

centered on technology, so it would be no small matter if "tech" ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? In the Bubble is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, "the schlock of the new" but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. In the Bubble describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants

to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of In the Bubble is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.
