#### Identifying Potential for Equitable Access to Tertiary Level Science

Marissa Rollnick 2010-07-20 Higher education internationally is in a state of transition and transformation, leading to an increase in the level of participation, and a consequent increase in number of non traditional and underprepared students. The appearance of these students provides a particular challenge in the sciences where adequate grounding is crucial. One response to this challenge has been the provision of access, foundation or "second chance programmes" which operate on different models internationally. In South Africa, where the push for equity is strong in the wake of the apartheid era, programmes have generally been established at all tertiary institutions with some of the most successful of these programmes based at universities characterised by a high research output. Consequently in the last decade there has been a great deal of research into the effectiveness of these programmes both at a micro and macro level. Similar research in other countries exists, but is patchy and often based on small groups of students. This book provides valuable information on what research has to say about disadvantaged and under prepared science students and how they learn - what works and what does not work. It provides an examination of issues related to the programmes, their structure, student selection and adjustment. Issues such as the learning of these students, their communicative ability and laboratory work come under the spotlight. Although examining the issue internationally, the book draws heavily on lessons from South Africa where there has been considerable experience of such programmes.

**A Learning-Centered Framework for Education Reform** Elizabeth Demarest 2015-04-24 In her new book, Betty Demarest describes a bold agenda for education reform—one that is firmly grounded in a synthesis of educational research about learning, teaching, and the contexts of education. The author's "learning-centered" framework includes: (1) a broad and balanced set of education goals, (2) a multi-faceted concept of achievement, (3) classroom capacity for learning, (4) systemic capacity and infrastructure, (5) shared, reciprocal accountability, and (6) systems of multiple assessments. New research-based concepts in these six areas are critically compared to older concepts behind standards-based reform and No Child Left Behind. Book Features: A comprehensive, alternative framework for future education reform that focuses on improving the core educational practices of learning, teaching, content, and leadership. A federal role that emphasizes meaningful partnerships rather than top-down control. A critique of past standards and present accountability-based frameworks, with implications of the learning-centered framework for future national policy, especially ESEA. An operational definition of educational capacity, a re-conceptualization of accountability, and a sharp reversal of the relative emphasis placed on these strategies. Elizabeth J. Demarest is an education consultant living in Alexandria, Virginia. She was formerly with the U.S. Department of Education and the National Education Association. "Betty Demarest clearly defines a learning-centered framework for improving policy and practice. Practitioners can benefit from the strategies outlining a clear pathway for transforming to learning-centered practice in our nation's classrooms." —Gerald N. Tirozzi, executive director, National Association of Secondary School Principals "Betty Demarest's deep experience with research and policy development allows her to re-envision reform at many levels, all based on research evidence for valid concepts and practices of teaching and learning. This book is a welcome gift to policymakers and practitioners." —Roland Tharp, research professor, University of California, Berkeley "Demarest provides a research-based foundation for informed discussion and debate as Congress renews federal education law. Her synthesis of key issues should provide a starting point for any serious discussion of the way forward in federal education policy." —Mary Haywood Metz, professor emerita, University

of Wisconsin-Madison

### **Digital Distractions in the College Classroom** Flanigan, Abraham

Edward 2022-02-04 Student misuse of mobile technology for off-task purposes has become an international phenomenon in college classrooms. When a student's self-regulation of learning breaks down in the classroom, or when their task motivation begins to wane, turning toward their digital devices for leisure purposes is often the result. Although numerous studies have independently examined student digital distraction in the context of the college classroom, there remains a need to organize the field's collective understanding of the phenomenon. **Digital Distractions in the College Classroom** explores the challenges that arise from student digital distraction along with potential solutions, including how mobile technology can be leveraged to improve student motivation, self-regulation of learning, and achievement. Addressing topics such as academic motivation and instructional design, this book is ideal for instructional designers, instructors, researchers, administrators, academicians, and students.

Taking an approach that is both evidence-based and practical, author Pedro de Bruyckere explores ten crucial aspects of teaching, the research behind them and why they work like they do, combined with everyday classroom examples describing both good and bad practice. Key topics include: Teacher subject knowledge Evaluation and feedback The importance of practice Metacognition Making students think This is essential reading for teachers everywhere.

**The Power of Student Agency** Anindya Kundu 2020-07-10 How can we promote the learning and well-being of all students, especially those who come from some of the most disadvantaged backgrounds? Anindya Kundu argues that we can fight against deeply rooted inequalities in the American educational system by harnessing student agency--each person's unique capacity for positive change. To make his case, Kundu draws powerful narratives from a population of individuals who beat the odds to become academically and professionally successful. These strivers have overcome challenges such as broken families, homelessness, unexpected pregnancies, forms of abuse, incarceration, and more, to make it in the world. But it wasn't simply individualism, tenacity, resilience, or grit that helped them. Rather, as Kundu illustrates, it was a combination of social and cultural supports that paved the path towards their dreams, harnessing the inherent power of their agency. Book Features: A counter-narrative to the popular misconception that all students need is "grit." A strengths-based approach to education that is sensitive to students' communities and cultures. Rich, first-person quotes from individuals who have overcome immense odds. Useful diagrams for educational stakeholders on the relationship between grit and agency. Descriptions of dense sociological concepts presented in plain terms. Inclusion of fundamental and new waves in psychology.

**Organizational Learning Contracts** Paul S. Goodman 2011-04-29 This book addresses a new concept, the organizational learning contract, a shared agreement among the faculty, staff, and students in an educational institution about what, how, where, and when learning should take place. Goodman, who has pioneered the concept in his work with new and traditional institutions, examines the consequences of strong and weak contracts while bridging theory with practice. In the first section, Goodman develops the concept of the organizational learning contract, builds measures, and looks at the consequences of strong versus weak contracts on student and institutional effectiveness indicators. The second section, which includes the perspectives of two leaders of start-up institutions who have created new organizational contracts, explores issues of design and change in introducing the concept into new and existing institutions.

**Jewish Law in Transition** Hillel Gamoran 2008-10-17 The prohibition against lending on interest (Exodus 22:24) is a well-known biblical law: "If you lend to any one of my people with you who is poor, you shall not be to him as a creditor, and you shall not exact interest from him." This prohibition was intended to prevent the wealthy from exploiting the unfortunate. In the course of time, it was seen to have consequences that militated against the economic welfare of Jewish society as a whole. As a result, Jewish law (halakhah) has over the centuries relaxed the biblical injunction, allowing interest charges despite the biblical prohibition. Hillel Gamoran seeks to explain how and when this law of high moral standing collapsed and fell over the course of the centuries. Talmudic rabbis believed that business agreements violated the biblical prohibition against lending in five areas: loans of produce, advance payment for the purchase of goods, buying on credit, mortgages, and investments. The Bible does not consider any of these activities, but all arise in postbiblical literature. How was the biblical law to be applied to situations that had not occurred in biblical times? And how could the rabbis allow these activities when they were hampered from doing so by the laws against lending on interest? To answer these questions, Gamoran examines the biblical prohibition against lending and postulates when it was written, why it was written, and to whom it applied. He then considers the early and later teachers of the Oral Law, the Tannaim and Amoraim, who expanded discussion of the ban in light of various business activities from 70 C.E. to 500 C.E. Finally, he explores how the original tannaitic proscriptions for each of the five activities were upheld or relaxed over the centuries. Each activity is considered in the period of the Geonim (ca. 650-1050), the Rishonim (ca. 1000-1500), and the Aharonim (ca. 1500-2000). For each period, Gamoran shows how the rabbis struggled with the law and with one another and used inventive interpretation to create the legal fictions necessary for business life to flourish.

**Teaching Unprepared Students** Kathleen F. Gabriel 2023-07-03 As societal expectations about attending college have grown, professors report increasing numbers of students who are unprepared for the rigors of postsecondary education—not just more students with learning disabilities (whose numbers have more than tripled), but students (with and without special admission status) who are academically at-risk because of inadequate reading, writing and study skills. This book provides professors and their graduate teaching assistants—those at the front line of interactions with students—with techniques and approaches they can use in class to help at-risk students raise their skills so that they can successfully complete their studies. The author shares proven practices that will not only engage all students in a class, but also create the conditions—while maintaining high standards and high expectations—to enable at-risk and under-prepared students to develop academically and graduate with good grades. The author also explains how to work effectively with academic support units on campus. Within the framework of identifying those students who need help, establishing a rapport with them, adopting inclusive teaching strategies, and offering appropriate guidance, the book presents the theory teachers will need, and effective classroom strategies. The author covers teaching philosophy and goals; issues of discipline and behavior; motivation and making expectations explicit; classroom climate and learning styles; developing time management and study skills; as well as the application of “universal design” strategies. The ideas presented here—that the author has successfully employed over many years—can be easily integrated into any class.

**The Phenomenological Heart of Teaching and Learning** Katherine Greenberg 2019-01-10 This book presents a carefully constructed framework for teaching and learning informed by philosophical and empirical foundations of phenomenology. Based on an extensive, multi-dimensional case study focused around the 'lived experience' of college-level teaching preparation, classroom interaction, and students' reflections, this book presents evidence for the claim that the worldviews of both teachers and learners affect the way that they present and receive knowledge. By taking a unique phenomenological approach to pedagogical issues in higher education, this volume demonstrates that a truly transformative learning process relies on an engagement between consciousness and the world it 'intends'.
