Revitalizing Undergraduate Science Sheila Tobias 1992 This book explains why so few efforts at reforming science education are successful, and why it is that the 300 studies on the subject published over the past decade have done little more than add to a growing body of literature. The book describes programs which

are successful in terms of faculty accomplishments, students graduated and entering advanced study or professional workplace, and showing evidence of high morale among both faculty and undergraduates. Common elements in many of these programs are abandonment of an almost exclusive emphasis on problem solving and modification of the lecture format to permit teaching of underlying concepts. Other variations in traditional introductory physics and chemistry courses are aimed at persuading those simply fulfilling graduation requirements to major in science; at bringing minority students into the fold; or at combining physics or various sub-fields of chemistry in different ways to promote better understanding. Harvard's "chem-phys," is provided as an example of such a combination, but also as a case study of how innovation can be stymied by a lack of university-wide change. The author uses methods of ethnography in reporting what makes individual programs

interesting, what their faculty are doing, and what program participants are thinking. (PR)
Artist Teacher James Daichendt 2010-04-01
The philosophy of the artist-teacher is not a new phenomenon. In fact, many artists working within the Bauhaus, nineteenth century Schools of Design, and The Basic Design Movement all applied this method of thinking to their teaching. Artist Teacher explores the many facets of this methodology, and the various ways art has been taught over the centuries, using several important artist-teachers (George Wallis, Walter Gropius, Richard Hamilton, Hans Hoffman) to illustrate the rich and deep ways artists are able to facilitate learning. Artist Teacher will serve as a foundational text for those entering the teaching profession at all levels, in addition to inspiring experienced art teachers in all disciplines.

The Oxford Encyclopedia of Women in World History

Bonnie G. Smith 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive, 4-volume work. Although there has been extensive research on women in history by region, no text or reference work has comprehensively covered the role women have played throughout world history. The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and

demonstrated that there is virtually no historical, social, or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences, and illuminates how women worldwide have influenced and been influenced by these historical, social, and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies; geography and history; comparative culture and society, including adoption, abortion, performing arts; organizations and movements, such as the Egyptian Uprising, and the Paris Commune; women's and gender studies; and topics in world history that include slave trade, globalization, and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued, go-to resource for scholars, college and

high school students, and general readers alike.

The River of Lost Footsteps Thant Myint-U 2007-05-15 For nearly two decades Western governments and a growing activist community have been frustrated in their attempts to bring about a freer and more democratic Burma—through sanctions and tourist boycotts—only to see an apparent slide toward even harsher dictatorship. But what do we really know about Burma and its history? And what can Burma's past tell us about the present and even its future? In *The River of Lost Footsteps*, Thant Myint-U tells the story of modern Burma, in part

through a telling of his own family's history, in an interwoven narrative that is by turns lyrical, dramatic, and appalling. His maternal grandfather, U Thant, rose from being the schoolmaster of a small town in the Irrawaddy Delta to become the UN secretary-general in the 1960s. And on his father's side, the author is descended from a long line of courtiers who served at Burma's Court of Ava for nearly two centuries. Through their stories and others, he portrays Burma's rise and decline in the modern world, from the time of Portuguese pirates and renegade Mughal princes through the decades of British colonialism, the devastation of World War II, and a sixty-year civil war that continues today and is the longest-running war anywhere in the world. *The River of Lost Footsteps* is a work both personal and global, a distinctive contribution that makes Burma accessible and enthralling.

Information Now Matt Upson 2015-10-26
Every day researchers face an onslaught of

irrelevant, inaccurate, and sometimes insidious information. While new technologies provide powerful tools for accessing knowledge, not all information is created equal. Valuable information may be tucked away on a shelf, buried on the hundredth page of search results, or hidden behind digital barriers. With so many obstacles to effective research, it is vital that higher education students master the art of inquiry. *Information Now* is an innovative approach to information literacy that will reinvent the way college students think about research. Instead of the typical textbook format, it uses illustrations, humor, and reflective exercises to teach students how to become savvy researchers. Students will learn how to evaluate information, to incorporate it into their existing knowledge base, to wield it effectively, and to understand the ethical issues surrounding its use. Written by two library professionals, it incorporates concepts and skills drawn from the Association of College and Research Libraries'

Information Literacy Competency Standards for Higher Education and their Framework for Information Literacy for Higher Education. Thoroughly researched and highly engaging, Information Now offers the tools that students need to become powerful consumers and creators of information. Whether used by a high school student tackling a big paper, an undergrad facing the newness of a university library, or a writer wanting to go beyond Google, Information Now is a powerful tool for any researcher's arsenal.

Principles and Practice of Forensic Psychiatry

Richard Rosner 2017-02-03 The third edition of this award-winning textbook has been revised and thoroughly updated. Building on the success of the previous editions, it continues to address the history and practice of forensic psychiatry, legal regulation of the practice of psychiatry, forensic evaluation and treatment, psychiatry in relation to civil law, criminal law and family law, as well as correctional forensic psychiatry. New chapters address changes in the assessment and treatment of aggression and violence as well as psychological and neuroimaging assessments.

Losing It All to Sprawl Bill Belleville

2006-03-27 Losing It All to Sprawl is the

poignant chronicle of award-winning nature writer Bill Belleville and how he came to understand and love his historic Cracker farmhouse and "relic" neighborhood in central Florida, even as it was all wiped out from under him. Belleville's narrative is eloquent, informed, and impassioned, a saga in which tractors and backhoes trample through the woods next to his home in order to build the backbone of Florida sprawl--the mall. As heavy machinery encircles Belleville and his community--the noise growing louder and closer, displacing everything Belleville has called home for the past fifteen years--he tells a story that is much older, 10,000 years older. The story stretches back to the Timucua and the Mayaca living in harmony with Florida's environment; the conquistadors who expected much from, but also feared, this "land of flowers"; the turn-of-the-century tourists "modernizing" and "climatizing" the state; the original Cracker families who lived in Belleville's farmhouse. In stark contrast to this millennia-

long transformation is the whiplash of unbridled growth and development that threatens the nearby wilderness of the Wekiva River system, consuming Belleville's home and, ultimately, his very sense of place. In Florida, one of the nation's fastest growing states (and where local and state governments encourage growth), balancing use with preservation is an uphill battle. Sprawl spreads into the countryside, consuming not just natural lands but Old Florida neighborhoods and their unique history. In *Losing It All to Sprawl*, Belleville accounts for the impacts--social, political, natural, personal--that a community in the crosshairs of unsustainable growth ultimately must bear, but he also offers Floridians, and anyone facing the blight of urban confusion, the hope that can be found in the rediscovery and appreciation of the natural landscape.

Language As Symbolic Action Kenneth Burke

2023-04-28 From the Preface: The title for this collection was the title of a course in literary criticism that I gave for many years at Bennington College. And much of the material presented here was used in that course. The title should serve well to convey the gist of these various pieces. For all of them are explicitly concerned with the attempt to define and track down the implications of the term "symbolic action," and to show how the marvels of literature and language look when considered from that point of view.

The Action Learning Handbook Anne Brockbank

2003-12-16 Action learning is a continued process of learning and reflection with the support of a group of colleagues, working on real issues. The action learning method is increasingly used to bring innovation to many different fields of work. The principles of action learning can achieve improvement and transformation in a wide range of applications and disciplines, including professional training and educational contexts. This book is a comprehensive guide to action learning which maintains an accessible, practical focus throughout. It is packed with useful resources, including case studies and ideas for workshop sessions. Key topics covered include: * action learning in professional and educational settings * setting up, facilitating and evaluating an action learning programme * the roles and skills required to practice successfully * use of action learning in relation to the individual, the group and the organization * the role of reflection; and action learning theory. Newcomers to the area

of action learning will find this an essential introduction which can be put to use straight away, while more experienced practitioners seeking a deeper understanding will value the thorough analysis of action learning theory.

Modern Methods in Protein Nutrition and Metabolism Steven Nissen 2012-12-02 Modern Methods in Protein Nutrition and Metabolism grew out of a series of seminars (Modern Views in Nutrition) held in 1989 at Iowa State University. These seminars and this book were financed primarily through the Wise and Helen Burroughs Lectureship endowment generously established by the late Dr. Wise Burroughs and his wife Helen. This book comprises 12 chapters, and begins with a focus on amino acid analysis in food and physiological samples. Succeeding chapters go on to discuss concepts and techniques on nitrogen balance; determination of the amino acid requirements of animals; and novel methods for determining protein and amino acid digestibilities in feedstuffs. Other

chapters cover measurement of protein digestion in ruminants; evaluation of protein status in humans; surgical models to measure organ amino acid metabolism in vivo; and measurement of whole-body protein content in vivo. The remaining chapters discuss estimation of protein synthesis and proteolysis in vitro; isotopic estimation of protein synthesis and proteolysis in vivo; n-glycine as a tracer to study protein metabolism in vivo; and mathematical models of protein metabolism. This book will be of interest to practitioners in the fields of human nutrition and medicine.

Tim O'Brien Patrick A. Smith 2005-06-30 After growing up in Minnesota and graduating from college, Tim O'Brien received a draft notice and joined the war effort in Vietnam. He chronicled his combat experiences in his memoir *If I Die in a Combat Zone, Box Me Up and Ship Me Home*, and then went on to write the eight novels that are discussed in this volume. The novels reflect their characters' struggle with the effects of

place, namely small-town America, in the Vietnam Era.

Responding to reader demand, *Agricultural Medicine, Second Edition* now features more case studies, key point summaries, and new international perspective chapters comparing North American health and agricultural practices to those in Europe, the

Asia Pacific, and South America. Agricultural health and safety engages a multidisciplinary team of medical professionals, veterinarians, safety professionals, engineers, sociologists, epidemiologists, and psychologists, for whom this book serves as an essential resource.

The Poetics of Ruins in Renaissance

Literature Andrew Hui 2017-01-02 The Renaissance was the Ruin-naissance, the birth of the ruin as a distinct category of cultural discourse, one that inspired voluminous poetic production. For humanists, the ruin became the material sign that marked the rupture between themselves and classical antiquity. In the first full-length book to document this cultural phenomenon, Andrew Hui explains how the invention of the ruin propelled poets into creating works that were self-aware of their absorption of the past as well as their own survival in the future.

Electromagnetic Nondestructive Evaluation

(XVII) K. Capova 2014-07-02 The demand for

new and effective methods for the evaluation, maintenance and live-time testing of objects in fields as diverse as engineering, medicine and art, continues to grow. Electromagnetic non-destructive evaluation is a process by which an object can be assessed without permanent alteration by means of inducing electric currents or magnetic fields within the object and observing the electromagnetic response. This book presents selected papers from the 18th International Workshop on Electromagnetic Non-destructive Evaluation (ENDE), which was held in Bratislava, Slovak Republic, on June 25-28, 2013. The aim of the workshop was to provide an international forum for the discussion of the state-of-the-art and perspectives in the field from the view of science, technology and engineering. The book is divided into five main sections: advanced sensors; analytical and numerical modeling and biomedical applications; innovative industrial applications; new developments; and, solutions of inverse

problems. Containing 40 peer-reviewed papers, it will be of interest to all those whose work involves electromagnetic non-destructive evaluation, whatever their discipline.

Marianne Moore, Imaginary Possessions Bonnie Costello 1981 Analyzes the stages in Moore's development from purely imagist style to her preoccupations with the visual arts, with the question of form in relation to message and with the conflict between tension and fluency. Contains readings of individual poems, shedding light on their meaning and tone, under such headings as "Images of Sweetened Combat" and "Images of Luminosity, Iridescence, and Metamorphosis".

The Literature Review Lawrence A. Machi 2012-06-08 This new edition of the best-selling book offers graduate students in education and the social sciences a road map to developing and writing an effective literature review for a research project, thesis, or dissertation. Organized around a proven six-step model and

incorporating technology into all of the steps, the book provides examples, strategies, and exercises that take students step by step through the entire process: Selecting a topic Searching the literature Developing arguments Surveying the literature Critiquing the literature Writing the literature review The second edition includes key vocabulary words, technology advice, and additional tips on when and how to write during the early stages--including the use of journals and memoranda--to make the literature review process a success.
