We Have Not a Government George William Van Cleve 2019-04-05 In 1783, as the Revolutionary War came to a close, Alexander Hamilton resigned in disgust from the Continental Congress after it refused to consider a fundamental reform of the Articles of Confederation. Just four years later, that same

government collapsed, and Congress grudgingly agreed to support the 1787 Philadelphia Constitutional Convention, which altered the Articles beyond recognition. What occurred during this remarkably brief interval to cause the Confederation to lose public confidence and inspire Americans to replace it with a dramatically more flexible and powerful government? We Have Not a Government is the story of this contentious moment in American history. In George William Van Cleve's book, we encounter a sharply divided America. The Confederation faced massive war debts with virtually no authority to compel its members to pay them. It experienced punishing trade restrictions and strong resistance to American territorial expansion from powerful European governments. Bitter sectional divisions that deadlocked the Continental Congress arose from exploding western settlement. And a deep, long-lasting recession led to sharp controversies and social unrest across the country amid roiling

debates over greatly increased taxes, debt relief, and paper money. Van Cleve shows how these remarkable stresses transformed the Confederation into a stalemate government and eventually led previously conflicting states, sections, and interest groups to advocate for a union powerful enough to govern a continental empire. Touching on the stories of a wide-ranging cast of characters—including John Adams, Patrick Henry, Daniel Shays, George Washington, and Thayendanegea—Van Cleve makes clear that it was the Confederation’s failures that created a political crisis and led to the 1787 Constitution. Clearly argued and superbly written, *We Have Not a Government* is a must-read history of this crucial period in our nation’s early life.

The American Revolution United States. Bureau of Postsecondary Education 1976 The birth of the American Republic was indeed a "shot heard round the world." Not only was it of major international significance at the time, but it remains an event of continuing interest and

influence in the contemporary world. It is therefore not surprising that the American Revolution is included in the curriculum of the school systems of most nations. This set of selections from the history texts of 13 of these nations is not the first nor will it be the last effort by educators to gather the curricular perceptions of other countries about key events or periods in American history. Indeed, as the appendix reveals, the Office of Education published its first report more than 80 years ago on how the American Revolutionary War was taught in the schools of other nations. The particular merit of the present compilation is that it provides American teachers with valuable contemporary source material not otherwise readily available for teaching about the American Revolution, especially during the period of the Bicentennial Celebration. Teachers interested in inquiry learning, a comparative approach to history, and/or international understanding can utilize the collection in a

variety of ways to help students develop their analytical skills and broaden their understanding of American history and of factors which contribute to intercultural communication.

What Is a Nation? and Other Political Writings
Ernest Renan 2018-08-28 Ernest Renan was one of the leading lights of the Parisian intellectual scene in the second half of the nineteenth

century. A philologist, historian, and biblical scholar, he was a prominent voice of French liberalism and secularism. Today most familiar in the English-speaking world for his 1882 lecture "What Is a Nation?" and its definition of a nation as an "everyday plebiscite," Renan was a major figure in the debates surrounding the Franco-Prussian War, the Paris Commune, and the birth of the Third Republic and had a profound influence on thinkers across the political spectrum who grappled with the problem of authority and social organization in the new world wrought by the forces of modernization. *What Is a Nation? and Other Political Writings* is the first English-language anthology of Renan's political thought. Offering a broad selection of Renan's writings from several periods of his public life, most previously untranslated, it restores Renan to his place as one of France's major liberal thinkers and gives vital critical context to his views on nationalism. The anthology illuminates the characteristics

that distinguished nineteenth-century French liberalism from its English and American counterparts as well as the more controversial parts of Renan's legacy, including his analysis of colonial expansion, his views on Islam and Judaism, and the role of race in his thought. The volume contains a critical introduction to Renan's life and work as well as detailed annotations that assist in recovering the wealth and complexity of his thought.

The Causes of the American Revolution

Thomas Ladenburg 1989 This document is part of a series of units in United States history. It is designed for teachers to use in teaching colonial history and the American Revolution in greater depth than that provided in many textbooks. The unit contains 16 chapters, the first of which explains the unit's focus on four kinds of questions of interest to historians. These questions are: (1) contextual questions, (2) factual questions, (3) moral or value questions,

and (4) questions of explanation. Chapters 2-4 look primarily at contextual questions, introducing students to the social, political, economic, and ideological settings of the Revolution. The central section of the unit, chapters 5-15, is concerned with both factual and moral or value questions. Students not only learn about the events that led up to the Revolution, they also compare conflicting accounts of these events. They learn a three-criterion test for determining whether specific acts of protest are justified and apply this test to a number of examples of colonial protest. A central activity in this portion of the unit is reenactment of the trial of the British soldiers involved in the Boston Massacre. Following this experience, students examine the similarities and differences between the Boston Massacre and the confrontation between Vietnam war protesters and a contingent of the National Guard at Kent State University 200 years later. Other major activities in this portion of the unit

include analyzing the Declaration of Independence and debating whether the Revolution was justified. The final chapter invites students to act as historians, choosing among three schools of historical interpretation and writing essays detailing how the interpretation explains the Revolution's causes.
